

Report for Drucker Labs

Sample ID	Brunswick Lab ID	ORAC _{hydro} * (μ moleTE/L)	ORAC _{lipo} ^ (μ moleTE/L)	ORAC _{total} (μ moleTE/L)
IntraMAX Lot# 415	06-1457	54,982	1,041	56,023

*The ORAC analysis provides a measure of the scavenging capacity of antioxidants against the peroxy radical, which is one of the most common reactive oxygen species (ROS) found in the body. ORAC_{hydro} reflects water-soluble antioxidant capacity and the ^ ORAC_{lipo} is the lipid soluble antioxidant capacity. Trolox, a water-soluble Vitamin E analog, is used as the calibration standard and the ORAC result is expressed as micromole Trolox equivalent (TE) per liter.

The acceptable precision of the ORAC assay is 15% relative standard deviation.¹⁻²

Testing performed by J. Frietas.

Approved by:

Boxin Ou, PhD.
Vice President
